# Tyre Policies

- Knowledgeable and experienced account managers
- Complete independence, giving total policy impartiality
- Accredited by the most accomplished manufacturers and commercial tyre networks.

Due to many years of experience in the field of Commercial Tyre Management, our highly skilled Account Managers can help you to make an informed decision about the right tyres for your fleet.

After taking into account the varying operating conditions and usages of your fleet (as demonstrated below), a mix of tyres will be suggested to best suit your needs, with a view to reducing your overall running costs.

After more than 50 years of trading, Dexel have built up strong relationships with some of the most accomplished tyre manufacturers in the world. However, as an independent company we can supply whatever brand of tyre most fits the needs of your fleet.

## Network Partners

"Seeing a Michelin Certified Centre sign above the door gives fleets the confidence that the dealer has been recognised by the leading truck tyre manufacturer in the market. No matter where you are in Europe, it's an indication of quality service and professional standards."

**Russell Bowyer, distribution programme manager at Michelin**
