Fleet Reports

Fleet Reporting

- Easily accessible
- Accurate, current and relevant fleet information
- A variety of customised reports produced on demand, or on a schedule to suit your needs.

Accurate, current and accessible information is key to a properly managed fleet.

With the quality and quantity of information Dexel can provide about the vehicles on your fleet we can ensure the right work is being carried out at the right time.

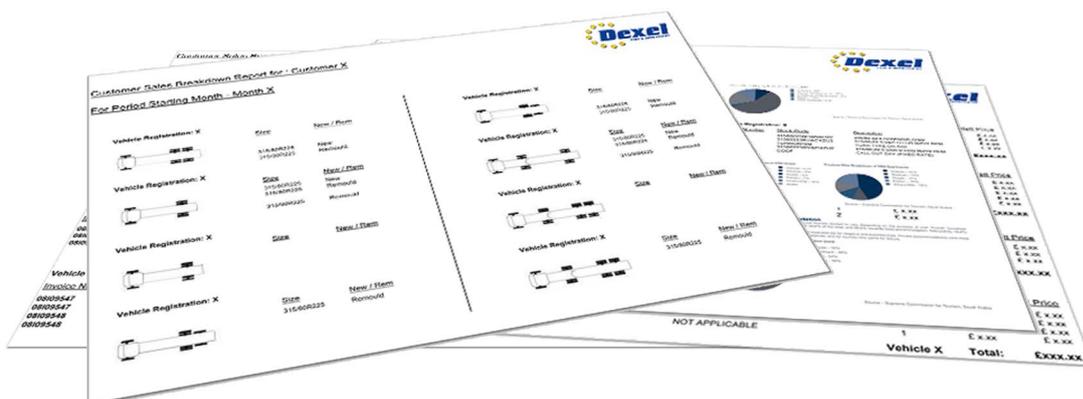

This will help to keep your operating costs down by ensuring you are getting the most out of all your resources.

As part of the Total Fleet Management service, we can produce a large variety of reports for you to measure any number of different aspects of your fleets performance, tyre performance and tyre/service item usage.

All of our reports can be produced on demand, monthly, quarterly, annually, after each inspection or to any schedule to suit your needs.

Additionally our sophisticated reporting suite allows for bespoke reports to be created according to specific customer requirements. Just tell your account manager what you need and we will endeavour to provide it.

Our highly experienced account managers can advise you on which reports are the most useful at different intervals and in different circumstances.

Multiple Fleet Reports

- Spends per vehicle
 - List of inspected vehicles
 - Work to do list
 - Inspection plan
 - List of tyres by tread depth
 - Products and services spend proportions
 - Tyre replacement reports
 - Current vehicle status
 - Fleet status
